ATSI's unique and comprehensive program provides a full range of services that can be packaged in almost any combination to suit any client's specific requirements.

These services include:

CLIENT CONSULTATION

Full initial consultation with each individual client to identify specific needs, and develop the scope of the project. Set nagging consultation procedures through to completion of project.

FACILITY REVIEW

On site visits by qualified personnel, who will provide a comprehensive facility inspection and review in accordance with industry standards. This report will outline the current safety and integrity of the facility, identify any service and maintenance requirements, and provide proposed solutions.

DOCUMENTATION REVIEW

A thorough review of all current facility documentation: including all design and engineering documentation, standard operational procedures, and maintenance manuals. Provide recommendations for improvements and upgrades, and develop new documentation where necessary.

ENGINEERING ANALYSIS

Qualified structural engineers will fully inspect all current equipment, and provide a detailed engineering analysis and report. This report will identify any engineering issues with the current facilities, and provide proposed solutions.

ATSI supplies comprehensive inspection & maintenance services to:

- Department of Defence
- Australian Army
- Royal Australian Air Force
- Royal Australian Navy
- Australian Police Forces
- Royal Military College and ADFA

ATSI provides a complete one-stop solution for the inspection, maintenance and certification of all defence and security services training facilities.

INSPECTION
