THE HIGHGATE GROUP

Highgate's unique and comprehensive program provides a full range of services that can be packaged in almost any combination to suit any client's specific requirements.

These services include:

DESIGN

Highgate designs an extensive range of training systems for Defence and Emergency Services.

All Highgate training systems are specifically tailored to meet the training needs of each individual client.

Each training system can incorporate one or more of HighGate's proprietary products integrated into a single client solution.

ENGINEERING

All Highgate facilities and individual products are professionally engineered and certified.

Highgate's fully qualified structural engineers will design, inspect and review all facilities prior to completion.

CONSTRUCTION

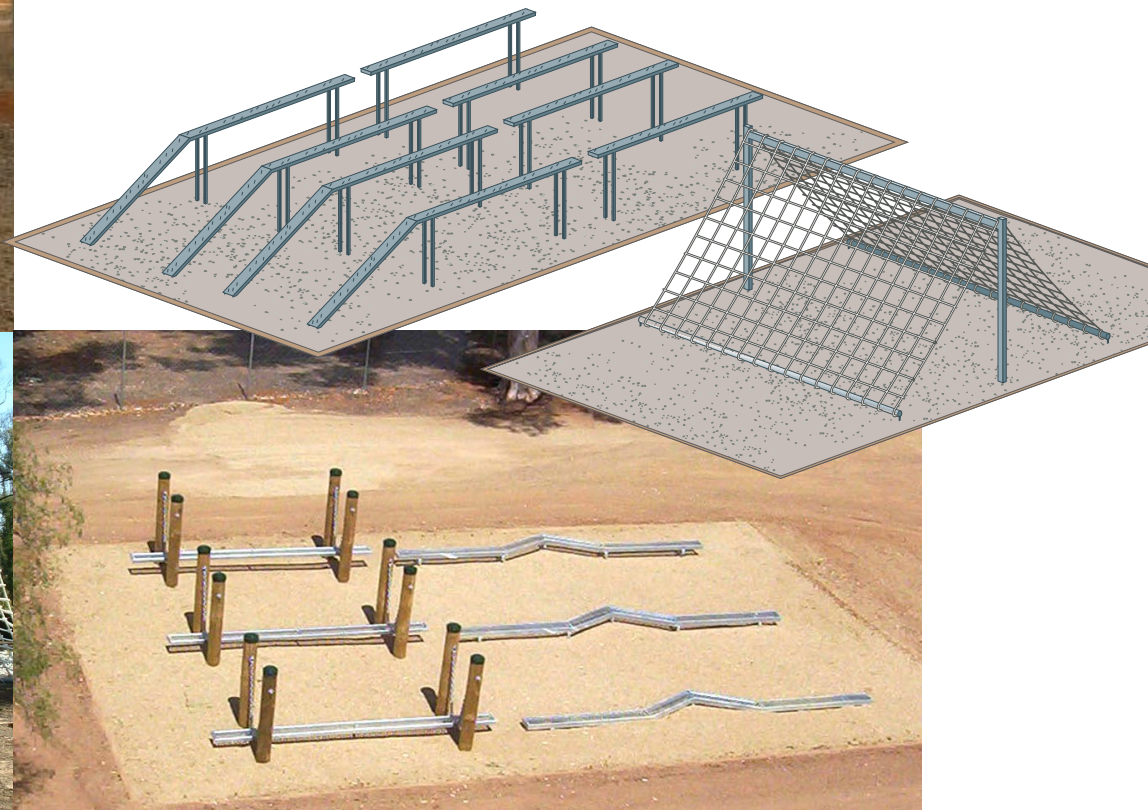

Highgate constructs all facilities in accordance with current international industry standards.

Highgate can provide purpose built facilities as well as provide enhancements to existing installations.

Highgate can provide a full turnkey construction service, including the supply of all specialist equipment.

PROJECT MANAGEMENT

Highgate has extensive experience in the project management of a wide range of advanced training facilities.

CERTIFICATION

Highgate can provide full engineering certification for all facilities and products designed and built by the company.

HighGate can also provide certification to current industry standards.

TRAINING

Highgate can provide a comprehensive train-the-trainer package including certification of all instructors.

Highgate can also provide ongoing training and assessment of all training staff.

In addition, Highgate can also offer an extensive range of tailor made leadership training programs created by leading industry experts.

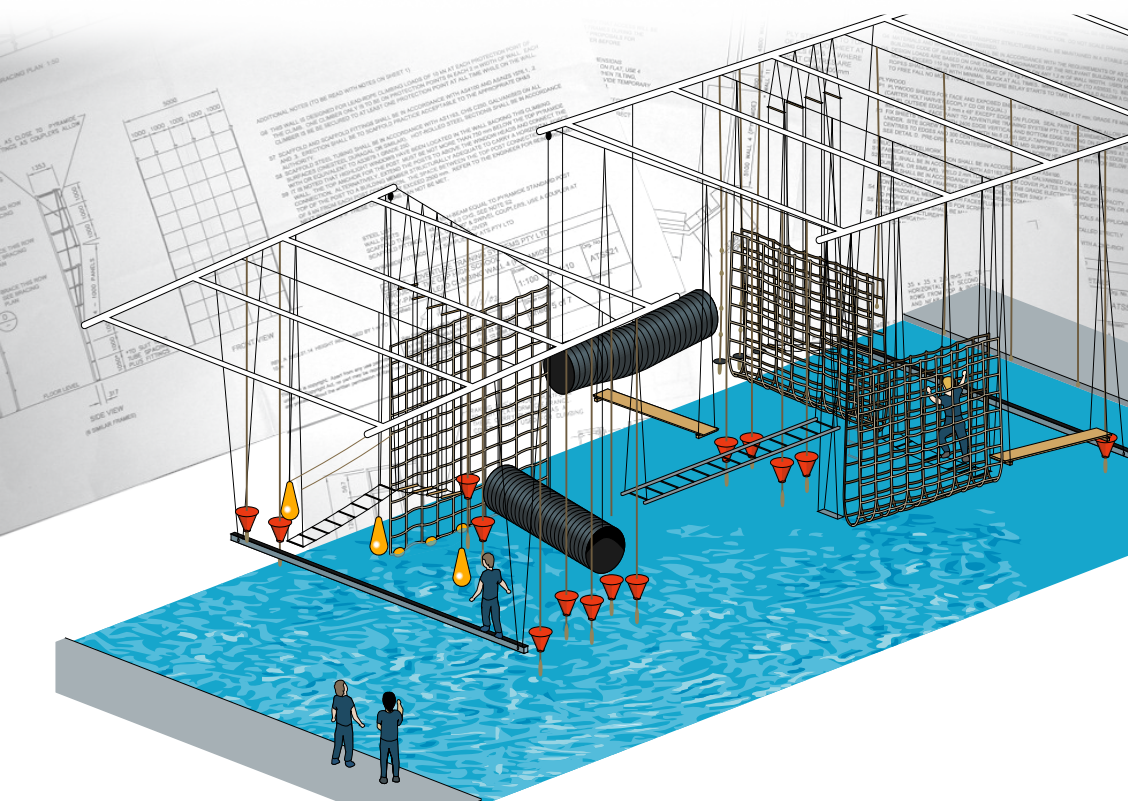

DOCUMENTATION

Highgate will provide each client with a comprehensive set of design drawings, engineering drawings, standard operational procedures and maintenance manuals.

MAINTENANCE

Highgate can provide a ongoing and comprehensive maintenance package, including regular inspections, refurbishments, repairs and upgrades.

Highgate can provide re-certification of all facilities for the life of the project.

THE HIGHGATE GROUP

Highgate is also a leading provider of inspection, maintenance and certification services for existing training facilities, including:

- Assault Courses
